IDENTIFIERS	*Arkansas

ABSTRACT

Fall 1982 on-campus enrollment data in Arkansas colleges and universities are presented, along with a narrative description of trends. The total headcount enrollment increased 1.6 percent to a record enrollment of 72,300, and the largest increase occurred in part-time enrollment at the state-supported two-year institutions. While enrollment was increasing at both the two-year and four-year state institutions, the independent four-year institutions were experiencing declines. Out-of-state enrollment classified by current legal residence increased 550 students (10 percent). The median age of Arkansas college students, 21, has remained stable during the past 3 years. The median age of all full-time students was 20; part-time students, 27. Currently, 52.5 percent of all Arkansas college students are female. Statistical tables cover the following areas: fall on-campus headcount by student level and type of institutions, 1973-1982; number and distribution of fall full- and part-time on-campus headcount students, 1978-1982; and fall on-campus headcount of first-time enrollees 1977-1982. Data are also presented on legal residence and average student load, median age of students, post-baccalaureate and first-professional students, and enrollment levels at private colleges. (SW)

Foreword

This report is part of the series of analytical reports published annually by the Arkansas Department of Higher Education (ADHE) based on data collected through the Arkansas Higher Education Information System (AHEIS). This is the third report on fall on-campus enrollment in Arkansas higher education institutions. The data for this report came primarily from the AHEIS reports of fall headcount enrollment in the 2 series and fall student semester credit hour production in the 15 series.

As the third edition of this report, there are a few new analyses of the data. However, there is always the tendency to repeat some of the analyses done previously. It would be especially helpful if readers would suggest other ways of looking at the data which they have found helpful or interesting.

We continue to appreciate the assistance gained from those persons who serve on the Information System Task Force. They have helped make the information system effective. The current membership of the task force includes Bill Osborne (UCA), Jim Andrews (HSU), Jerald Barber (PCCC), Richard Hudson (WCC), Eugene Buckley (UAF), Russell Helms (UAF), William Ed Coulter (OBU) and Charles Jackson (DVTE). Tom Spencer, ADHE Deputy Director, serves as chairman of the task force.

We continue to appreciate the efforts, cooperation and assistance of the institutional personnel, too numerous to list here, who prepare these reports. Without them the necessary information and, obviously, the series of analytical reports would be impossible. We are particularly pleased at the high degree of participation by the independent institutions which makes the AHEIS one of the few statewide information systems to cover all institutions of higher education.

This report was prepared by Joanne Branscum with the assistance of Tom Spencer. The ADHE production division, supervised by Corky Logan, provided assistance in preparing the various tables and readying the text for final publication.

Executive Summary

Enrollment at Arkansas colleges and universities was at a record high this year with 72,300 students enrolled. This was a 1.6% increase in headcount enrollment (1,131 students).

Most of the increase occurred at the state two-year institutions in part-time enrollment. Specifically, enrollment at East Arkansas Community College, Garland County Community College and North Arkansas Community College increased by a total of 821 students. Of those 821 students, 86% were part-time. Because of the increases in part-time enrollment, part-time enrollment as a percentage of total enrollment increased for the first time in four years. Full-time equivalent (FTE) enrollment at the state two-year institutions increased 5.1%. This was lower than the 9.6% increase in headcount enrollment because of the increase in part-time students. FTE enrollment at the state-supported four-year institutions increased 0.7% which was slightly higher than the increase in headcount enrollment, 0.5%. This increase in FTE was due to the slightly heavier average number of hours taken by students at the four-year institutions.

Out-of-state enrollment classified by current legal residence increased 550 students (10%) this year. Over half of the increase in out-of-state students occurred at Arkansas State University - Jonesboro (ASUJ) and Westark Community College (WCC). According to the Geographic Origin of Students report, 07-1, the 250 new foreign students at ASUJ resulted primarily from the implementation of a program for Saudi Arabian students and the 62 new out-of-state students resulted from an out-of-state fee waiver for students from certain contiguous states.

All of the increase in out-of-state enrollment, 46 students, can be attributed to an increase in students from LeFlore and Sequoyah counties in Oklahoma attending WCC. Under WCC policies, because these counties are within the Fort Smith SMSA, students from these counties are assessed out-of-district fees instead of out-of-state fees.

The median age of Arkansas college students, 21, has remained stable during the past three years. The median age of all full-time students was 20, while the median age of part-time students was 27.

Currently 52.5% of all Arkansas college students are female. It appears the growth in number of female students attending college has stabilized after a period of rapid growth during the past ten years. In 1980 the number of female college students increased by 10% from the previous year and represented over 54% of the total college population. During the past two years female students represented approximately 52% of the college population. The Census Bureau estimates that women accounted for 51.7% of the total Arkansas population in 1982. At the present time women are more than proportionately represented in the ranks of Arkansas college students.

ON-CAMPUS ENROLLMENT IN ARKANSAS HIGHER EDUCATION INSTITUTIONS, FALL 1982

The total headcount enrollment in Arkansas colleges and universities increased 1.5% this fall to a record enrollment of 72,300. The largest increase occurred in part-time enrollment at the state-supported two-year institutions. While enrollment was increasing at the state two- and four-year institutions, the independent four-year institutions were experiencing declines (-3.7%).

Although enrollment was at an all time high, this trend is not expected to continue. Enrollment is projected to decline in the next few years because of the current decline in first-time entering students as well as the projected decline in high school graduates. First-time enrollees have declined steadily during the past two years. However, the decline in first-time entering students may have been overstated. Second semester freshmen and sophomore students have increased steadily during the past two years. Part of this increase can be attributed to high school seniors starting college in the spring of 1982 in order to receive social security benefits during the next three years of college. Thus, they would show up as other lower division students, not first-time enrollees.

Another interesting factor pertaining to enrollment has been the growth of female students in higher education. For many years women were under-represented in higher education. However, female enrollment has increased dramatically during the past ten years. Currently, 52.5% of all Arkansas college students are women.

These and other areas pertinent to fall on-campus headcount enrollment in Arkansas and the nation's colleges and universities will be discussed in the following report.

Enrollment by Type of Institution

Table 1 displays fall on-campus headcount enrollment by type of institution for fall 1973 through fall 1982. Fall 1982 enrollment by type of institution as a percentage of total Arkansas higher education enrollment changed for the first time in four years due primarily to the increase in part-time enrollment at state two-year institutions. The percentage of students attending Arkansas state two-year institutions rose from 15% in fall 1981 to 17% in fall 1982. The percentage of students attending state four-year institutions declined from 72% of the total Arkansas higher education student body to 71%. Independent four-year institutions' enrollment declined from 12% to 11%.

The Arkansas higher education enrollment trends parallel national trends. The National Center for Education Statistics (NCES) reported that "total enrollment in public institutions rose slightly in 1982, up 0.3% for all types of institutions....most of the increase was taking place in two-year institutions."

NCES also reported that early estimates indicated total enrollment for private institutions dropped in 1982, down 1.5% from last year. Again, as in public institutions, the two-year schools have reported increases for the 1981-82 period, up nearly 5%.

TABLE 1. FALL ON-CAMPUS HEADCOUNT BY TYPE OF INSTITUTION, 1973 - 1982

Fall	State-Supported Two-Year Institutions	State-Supported Four-Year Institutions	Independent Two-Year Institutions	Independent Four-Year Institutions	Total
1973	4,154	38,978	618	7,832	51,582
1974	5,891	39,599	601	7,862	53,953
1975	9,869	44,519	621	8,158	63,167
1976	10,284	46,956	627	8,561	66,428
1977	9,746	47,927	620	8,607	66,900
1978	10,437	49,017	637	8,485	68,576
1979	10,828	50,327	649	8,381	70,185
1980	11,218	52,466	600	8,682	72,966
1981	11,114	51,778	581	8,596	72,069
1982	12,186	52,053	680	8,281	73,200

SOURCE: Enrollment Reports, ADHE 02-0

Table 2 displays changes in headcount enrollment from fall 1981 to fall 1982 by institution and by type of institution. Clearly, the major increases in headcount enrollment occurred at the two-year institutions. (See Appendix Tables A-2 through A-5 for headcount enrollment by institution for fall 1973 through fall 1982.

Table 2 also displays full-time equivalent (FTE) enrollment for the state-supported institutions. An FTE is determined by dividing total undergraduate student semester credit hours (SSCH) produced by an institution by 15 and graduate SSCH produced by 12. At the state-supported four-year institutions, full-time equivalent enrollment along with headcount enrollment increased in fall 1982. Although two-year institutions had a significant increase in FTE enrollment, 5.1%, the increase was not as large as the increase in headcount enrollment, 9.7%. The difference in the increase was due to an increase in part-time enrollment. The proportion of part-time headcount enrollment increased from 49.3% in fall 1981 to 52.2% in fall 1982 at the state two-year institutions. Conversely, state four-year institutions had a percentage increase in FTE enrollment larger than the percentage increase in headcount enrollment. This resulted from a slight increase in the percentage of full-time enrollment at the state-supported four-year institutions.

Among Arkansas state-supported two-year institutions, all institutions, with the exception of Southern Arkansas University-El Dorado Branch (SAUE), had increases in headcount enrollment. State-supported two-year institutions' headcount enrollment increased 9.6% with the most substantial increases being reported by Garland County Community College (GCCC), 35.7%, North Arkansas Community College (NACC), 23.6%, East Arkansas Community College (EACC), 21.0% and Arkansas State University-Beebe Branch (ASUB), 19.5%.

The increase at GCCC was primarily in part-time students and can be attributed to several factors: a cooperative program with Quapaw Vo-Tech school which allows a student to be enrolled in both institutions simultaneously; the new electronics and data processing programs; increased emphasis on recruitment through television, radio and other media; and an effort to interest senior citizens in the Garland County community in higher education opportunities. Because of the cooperative program with Quapaw Vo-Tech school, students from

***Source: ADHE 15 Series

the vo-tech school were allowed to enroll in certain remedial courses, English courses and math classes free of charge. The result of this agreement was the addition of approximately 100 students at GCCC. Although the co-op with vo-tech and the other new programs were certain to have influenced enrollment, the most significant factor was the appeal to adults in the Garland County community. In 1982, 553 people age 35 and over attended GCCC on a part-time basis. This was an increase of 338 people age 35 and over from the previous fall. A result of the additional 338 people was a significant increase in the percentage of total enrollment attending GCCC part-time. Approximately 70% of the students attending GCCC in fall 1982 attended part-time as compared to 63% in 1981.

Lack of emphasis on the evening program at NACC during fall 1981 resulted in a major decline in part-time enrollment that semester. Many of the evening classes omitted during fall 1981 were reinstated during fall 1982. Therefore, most of the 23.6% increase in enrollment at NACC can be attributed to the return of many part-time evening students. The fall 1982 enrollment of 900 students is only one higher than the enrollment of fall 1980.

Enrollment at EACC increased by 173 students (21%). The number of students from St. Francis county, EACC's home county, increased by 131 students this year. Of the 173 students, 55% were full-time and 45% were part-time. One explanation for EACC's increased enrollment was the implementation of an industrial arts program operated jointly by EACC and Crowley's Ridge Vocational Technical school which brought 61 new students to the institution. Another factor in the enrollment increase was intensified recruitment by EACC.

One hundred thirty-nine more students attended ASUB this year than last for an increase of 19.5%. Of the 139 students, 60 were full-time and 79 were part-time students. Most of the increase came from Lonoke and White counties. White is the home county for ASUB. First-time enrollees from Lonoke and White counties were up 35 and 70, respectively.

State-supported four-year institutions' headcount enrollment increased 0.5% from fall 1981 to fall 1982. Most of this increase was in full-time students. Six institutions reported increases in headcount enrollment and four reported

decreases. Of the six institutions reporting increases, the three with the largest percentage increases were Arkansas State University-Jonesboro (ASUJ), 4.6%, Southern Arkansas University-Magnolia (SAUM), 4.2% and Henderson State University (HSU), 5.3%.

Enrollment at HSU increased by 5.3% (133 students) from fall 1981 to fall 1982. The number of high school students graduating from HSU's drawing area increased from 3,759 in 1981 to 3,813 in 1982. While this may account for some of the 8% increase in first-time enrollees (up 64 students), there was also an increase in the drawing rate. An institution's draw from a particular county is determined by dividing the number of full-time, first-time entering undergraduate students by the number of high school students who graduated in that county the previous year. In the enrollment projection system now in use by ADHE, the counties from which an institution draws at least 3% of the high school graduates are termed its "draw area" and the number of entering freshmen at each institution is projected from high school graduates from the institution's draw area. Since sophomores progress from freshmen, juniors progress from sophomores and seniors progress from juniors, this draw area is the primary source for an institution's undergraduate enrollment. In addition to the increase in first-time enrollees, the number of students transferring from other institutions to HSU also increased, from 107 in 1981 to 200 in 1982.

Enrollment at ASUJ increased by 4.6% from fall 1981 to fall 1982. This was the second largest percentage increase and the largest numerical increase in enrollment among state four-year institutions. Total enrollment at ASUJ increased by 343 students. According to AHEIS Report 07-1 and 07-2, Geographic Origin of Students, 73% of the increase resulted from an increase in foreign students, 18% from an increase in out-of-state students and 9% from an increase in in-state students. The increase in foreign students resulted chiefly from a contract with the Saudi Arabian government to provide instruction for Saudi students at ASUJ. Enrollment at the undergraduate level increased by 280, 96% of which were from out-of-state and foreign countries. Graduate enrollment increased by 63, 70% of the increase came from out-of-state and foreign countries and 30% from in-state.

SAUM had a 4.2% increase in headcount enrollment (83 students). The majority of the increase occurred at the upper division undergraduate level. Upper division students increased by 67 from fall 1981 to fall 1982. The majority of this increase resulted from an increase in transfer students.

The four state four-year institutions experiencing declining enrollments were the University of Arkansas at Pine Bluff (UAPB), the University of Arkansas at Monticello (UAM), the University of Central Arkansas (UCA) and the University of Arkansas at Fayetteville (UAF).

The largest decline in enrollment at a state four-year institution occurred at UAPB. Enrollment at UAPB declined by 257 students, (-9.0%). Full-time enrollment declined by 220 students and part-time declined by 37 students. Enrollment at the upper division and unclassified prebaccalaureate levels were up 25. The declines occurred in first-time enrollees and other lower division students, down 76 and 206, respectively. According to AHEIS Report 02-3, Current Legal Residence of Students, 366 fewer in-state students attended UAPB this year than last. Out-of-state enrollment increased by 109 students. The decline in in-state students was not limited to one specific region. According to AHEIS Report 07-1, Geographic Origin of Students, last year students from 41 of Arkansas' 75 counties attended UAPB. Of those 41 counties, 27 sent fewer students this year than last and there was a general decrease in the percentage of the high school graduates from these counties attending UAPB.

Enrollment at UAM declined by 91 students (-4.8%), the result of a decrease in part-time enrollment. In the fall of 1982 UAM did not provide students free transportation to the institution for evening courses. The elimination of free transportation to the institution along with current economic conditions may have contributed to the decline in part-time enrollment at UAM.

Ninety-three fewer students attended UAF this fall than last (-0.6%). Eighty-seven percent of the decline at UAF occurred at the graduate and first-professional levels. Graduate enrollment declined by 54, and first-professional enrollment by 27. At the graduate level, most of decline was in part-time enrollment (down 40). Conversely, the decline in first-professional students resulted from a decline in full-time students (down 28).

The two-year independent institutions had the largest percentage increase in enrollment, 13.5%. However, these were also the smallest institutions and a few students can represent a large percentage increase. Crowley's Ridge College (CRC) reported an increase of 14 students (15.1%). This increase was attributed to improved student recruitment. Southern Baptist College (SBC) enrolled 61 more students for a 17.7% increase. All of the increase at SBC was in part-time enrollment. Most of the increase can be attributed to the implementation of a new data processing program which attracted a large number of students, particularly part-time night students.

Enrollment at the four-year independent institutions decreased 3.7% from fall 1981 to fall 1982. Only three institutions, Arkansas College (AC), Central Baptist College (CBC) and John Brown University (JBU) experienced increases in enrollment.

The largest increase, 16.3%, occurred at AC. A significant bequest, $14,000,000, allowed AC to increase the number of scholarships granted by the institution resulting in an increase in freshmen. Also, part-time enrollment increased due to an appeal to non-traditional students by AC.

The overall decline in enrollment at Arkansas' four-year independent institutions parallels a nationwide decline in students attending independent institutions. An article in the November 3, 1982 edition of The Chronicle of Higher Education stated that "the sluggish economy, combined with federal cuts in student aid and the threat of deeper cuts, is forcing new students to abandon their plans to attend independent colleges. Instead, they are postponing their higher education, or more often, opting for less expensive, government-run institutions."

Enrollment at Arkansas Baptist College (ABC) declined by 17% (36 students). The decline occurred at the other lower, upper division and unclassified prebaccalaureate student levels. First-time-entering enrollment increased by 17 students. The number of persons transferring to other area schools such as PSC, UALR and UCA from ABC was not a significant factor in the enrollment decline. It appears the students not returning to ABC for the fall semester either stopped or dropped out.

Philander Smith College (PSC) also experienced a decline in enrollment. In fact, the most significant decline in enrollment at the four-year independent institutions occurred at PSC (-26.1% or 163 students). Major declines occurred in other lower division enrollment. Other lower division refers to a freshman or sophomore student who has previously enrolled in college, has enrolled in a program, course of study or activity which leads to a degree or certificate and has earned less than 60 semester credit hours. Full-time other lower division enrollment declined by 106 and part-time other-lower division enrollment declined by 32. Again, transfers to other institutions did not seem to be a significant factor in the declining enrollment at PSC. The number of students attending PSC from Pulaski County alone declined by 181 students from fall 1981 to fall 1982.

Full-Time/Part-Time Enrollment Status

A student is classified as a "full-time student" if he/she is enrolled for a number of credit hours at least equal to 0.75 times the applicable normal student load. The minimum student load for a full-time student is usually 12 SSCH for an undergraduate student and nine credit hours for a graduate student. A student is classified as a "part-time student" if he/she is enrolled for a number of credit hours which is less than that required for the student to be classified as a full-time student.

Table 3 displays the number of full- and part-time students for fall 1978 through 1982. For the first time in five years the percentage of students attending Arkansas colleges and universities part-time increased. This increase resulted primarily from the increase in part-time enrollment at the two-year institutions. Specifically, most of the increase in part-time enrollment occurred at GCCC and NACC. Excluding the increase in part-time enrollment at these two institutions, 630 students, the percentage of total enrollment attending part-time would be exactly the same as last year, 24.6%. Table 4 displays percent full- and part-time fall on-campus headcount by institution for 1978 through 1982.

SOURCE: Enrollment Reports, ADHE 02-1, 02-2, 02-3, 02-4

Nationally, part-time enrollment declined. NCES reported that part-time enrollment was down by 0.7% and full-time enrollment was up 0.3% this year. "The economic recession was cited by some officials in higher education as one reason for the apparent reversal this year of the trend toward part-time study. More people may have time for full-time study because they are out of work, the argument goes. Even as this is happening, the officials speculate, the higher cost of full-time study must be pushing some financially hard-pressed students in the opposite direction."

The percentage of students attending college part-time in Arkansas, 45.3%, is considerably below the national average, 41.7%. This occurs because a larger proportion of Arkansas students attend four-year rather than two-year institutions and students attending four-year institutions tend to enroll full-time (See Table 5).

HEADCOUNT BY STUDENT LEVEL

First-Time-Entering

A student entering any college for the first time ever is considered a first-time-entering undergraduate student. Included in this category were students enrolled in the fall 1982 term who entered college for the first time in the summer of 1982 and entering students who have received college credit by examination.

In fall 1982, 16,956 students enrolled in 31 Arkansas colleges and universities for the first time. First-time enrollees were down 1.3% this fall. In fact first-time enrollment was at its lowest number since fall 1977 (See Table 6). Only state-supported two-year institutions increased in number of first-time enrollees during the past five years and most of the increase at the two-year institutions was in part-time enrollment. Figures 1 and 2 display the distribution of part-time and full-time-first-time entering Arkansas college students by type of institution for the past three years. The current decline in first-time enrollees was not the result of a decline in 1982 high school graduates. In fact, 1982 high school graduates were up 1%. It is believed the drop in full-time first-time enrollment may have occurred because of a change in social security benefits. If a student receiving social security benefits was enrolled in college full-time before May 1982, then that student will continue receiving social security benefits while attending college during the next three years. The benefits for the 1982-83 school year would be 75% of the benefits received during 1981-82. Benefits would be reduced another 25% annually for the next two years. A student over 18 years of age will no longer receive social security benefits to attend college after 1984-85. Social security benefits going to any student who had not started to college before May 1982 were discontinued after the student's 18th birthday. Because of this change, many high school seniors receiving social security benefits elected to enter college during the spring of 1982. This may be the reason for the 1.3% decline in first-time enrollees and the 3.1% increase in other lower division students.

FIGURE 1. DISTRIBUTION OF FALL PART-TIME FIRST-TIME ENROLLEES AT ARKANSAS COLLEGES, BY TYPE OF INSTITUTION, 1980 THROUGH 1982

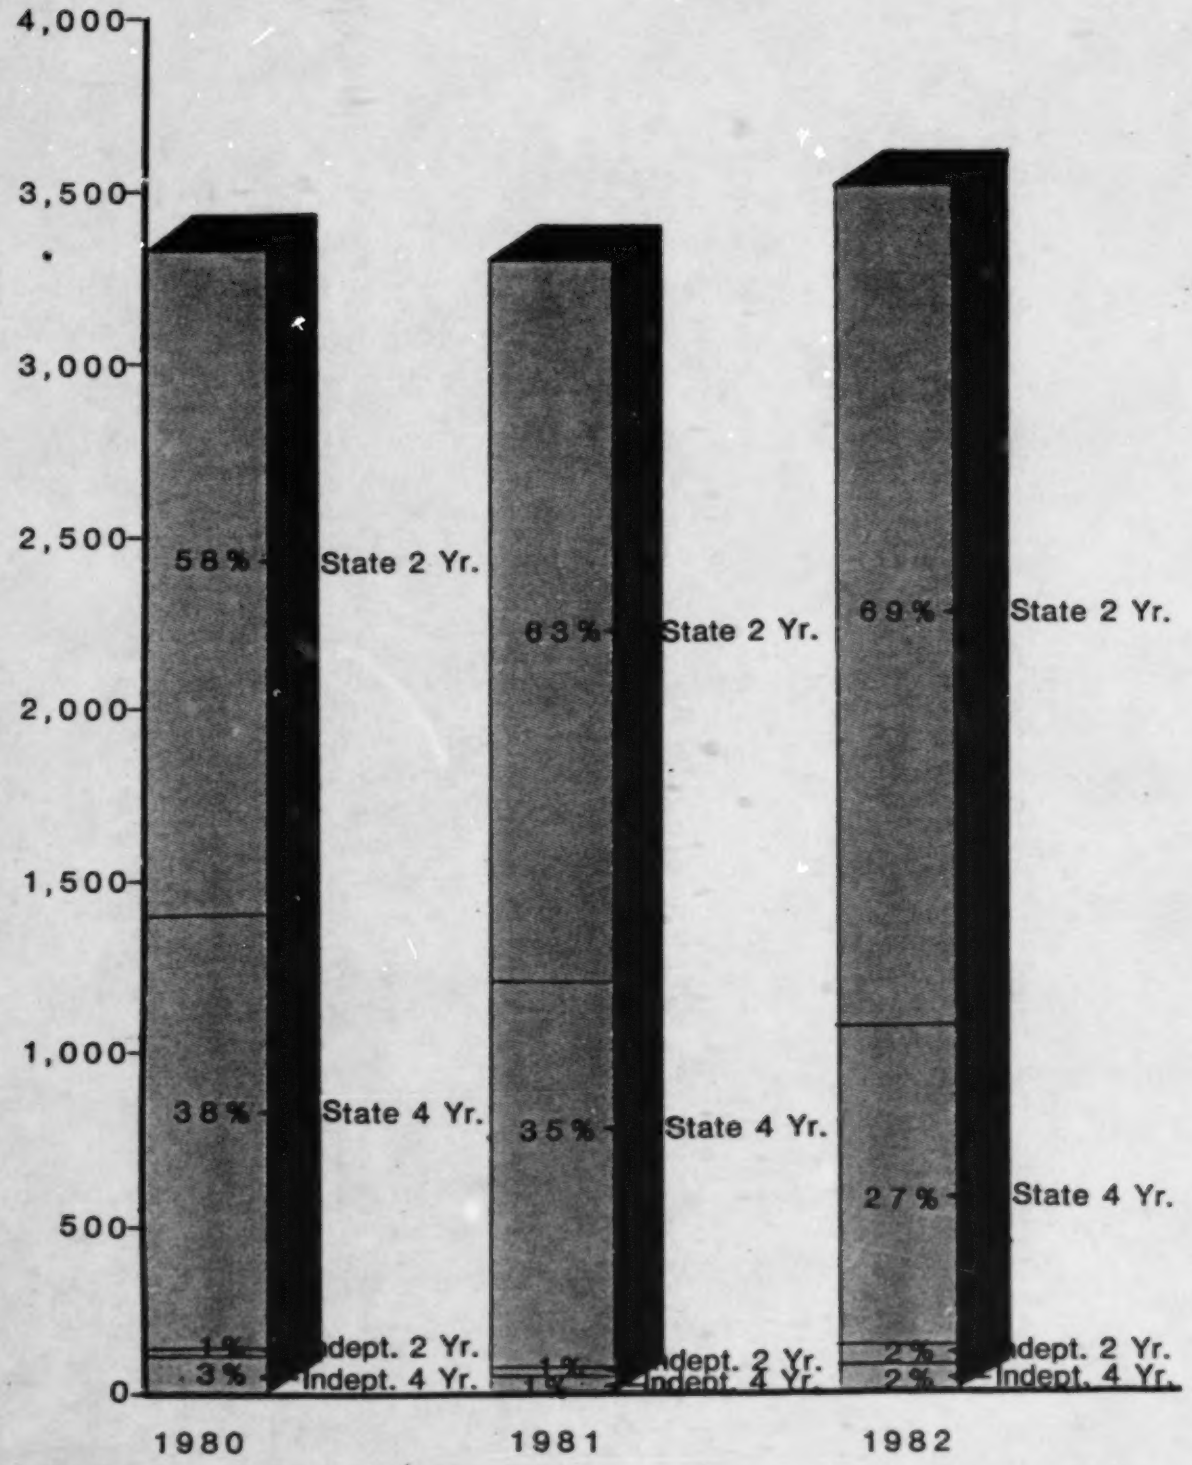

FIGURE 2. DISTRIBUTION OF FALL FULL-TIME FIRST-TIME ENROLLEES AT ARKANSAS COLLEGES, BY TYPE OF INSTITUTION, 1980 THROUGH 1982

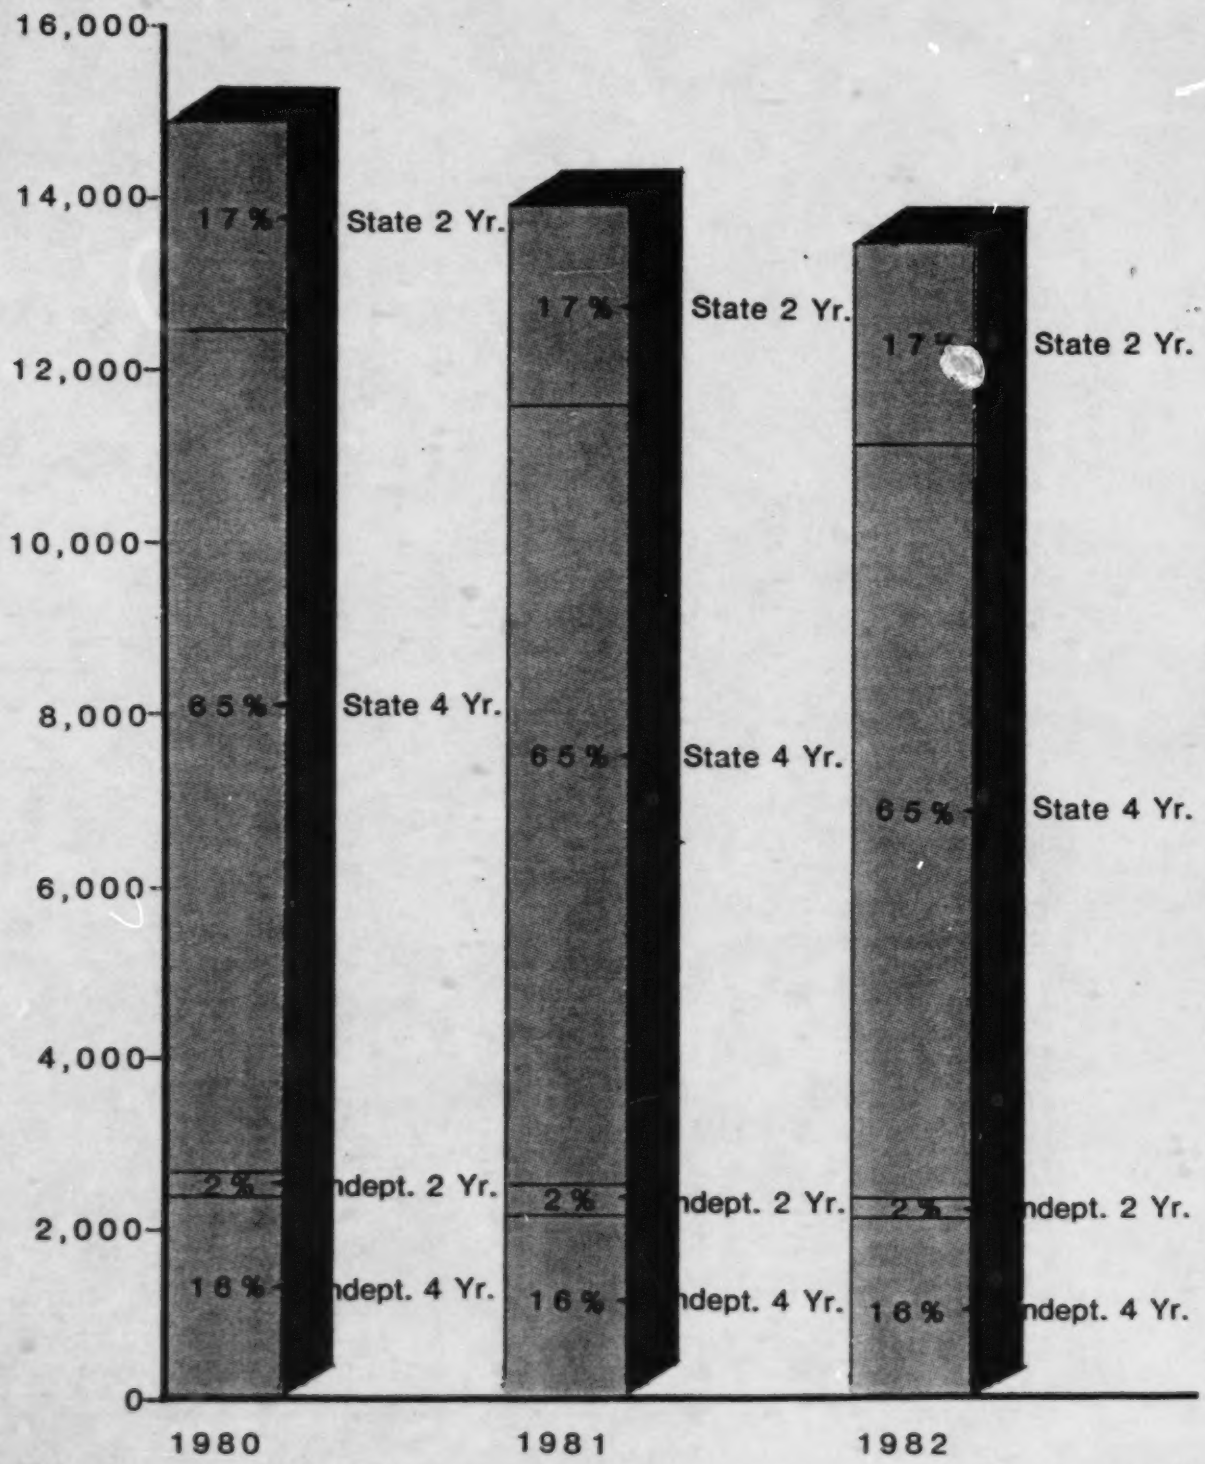

Table 7 displays on-campus headcount by student level by type of institution for fall 1980, 1981 and 1982. Total full-time first-time enrollees have declined by 1,505 since 1980. Each type of institution, excluding state two-year, has had steady declines in full-time first-time-entering students. Full-time first-time enrollees at the state two-year institutions remained stable. (Appendix Tables A-6 through A-9 display on-campus headcount and average load by student level by institution for fall 1982.)

Part-time first-time-entering enrollment has varied by type of institution. Both state and independent two-year institutions have had increases in part-time first-time-entering enrollment during the past three years. Part-time first-time-entering enrollment at the state four-year institutions has declined steadily during the past three years. There was a decrease in part-time first-time-entering enrollment at the independent four-year institutions from fall 1980 to fall 1981. However, due to AC establishing a night program, part-time enrollment at the independent four-year institutions increased from fall 1981 to fall 1982. Because of the increase in part-time enrollment, the average load for all first-time-entering students declined this year (See Table 8).

Other Lower Division

Other lower division refers to a student who has previously enrolled in college, has enrolled in a program, course of study or activity which leads to a degree or certificate and has earned less than 60 semester credit hours. Total other lower division headcount enrollment, for both part-time and full-time, has risen steadily during the past three years. Other lower division enrollment increased by 2.3% from fall 1980 to fall 1981 and 3.1% from fall 1981 to fall 1982. Again, because of changes in social security benefits, many high school seniors elected to begin college in the spring of 1982. Thus, other lower division enrollment increased this year.

Both state two- and four-year institutions had steady increases in other lower division enrollment. However, these same patterns of growth were not true for the independent institutions. Independent two-year institutions' other lower division enrollment dropped from 305 students in 1980 to 266 in 1981, then

increased to 327 in 1982. Independent four-year institutions' other lower division enrollment rose from 2,525 students in 1980 to 2,890 in 1981 and then dropped to 2,436 in 1982.

Figure 3 displays undergraduate enrollment by student level as a percentage of undergraduate enrollment for fall 1980 through fall 1982. As is evident from viewing the figure, the increases in total enrollment during the past three years have been largely the result of increases in other lower division enrollment.

Upper Division Enrollment

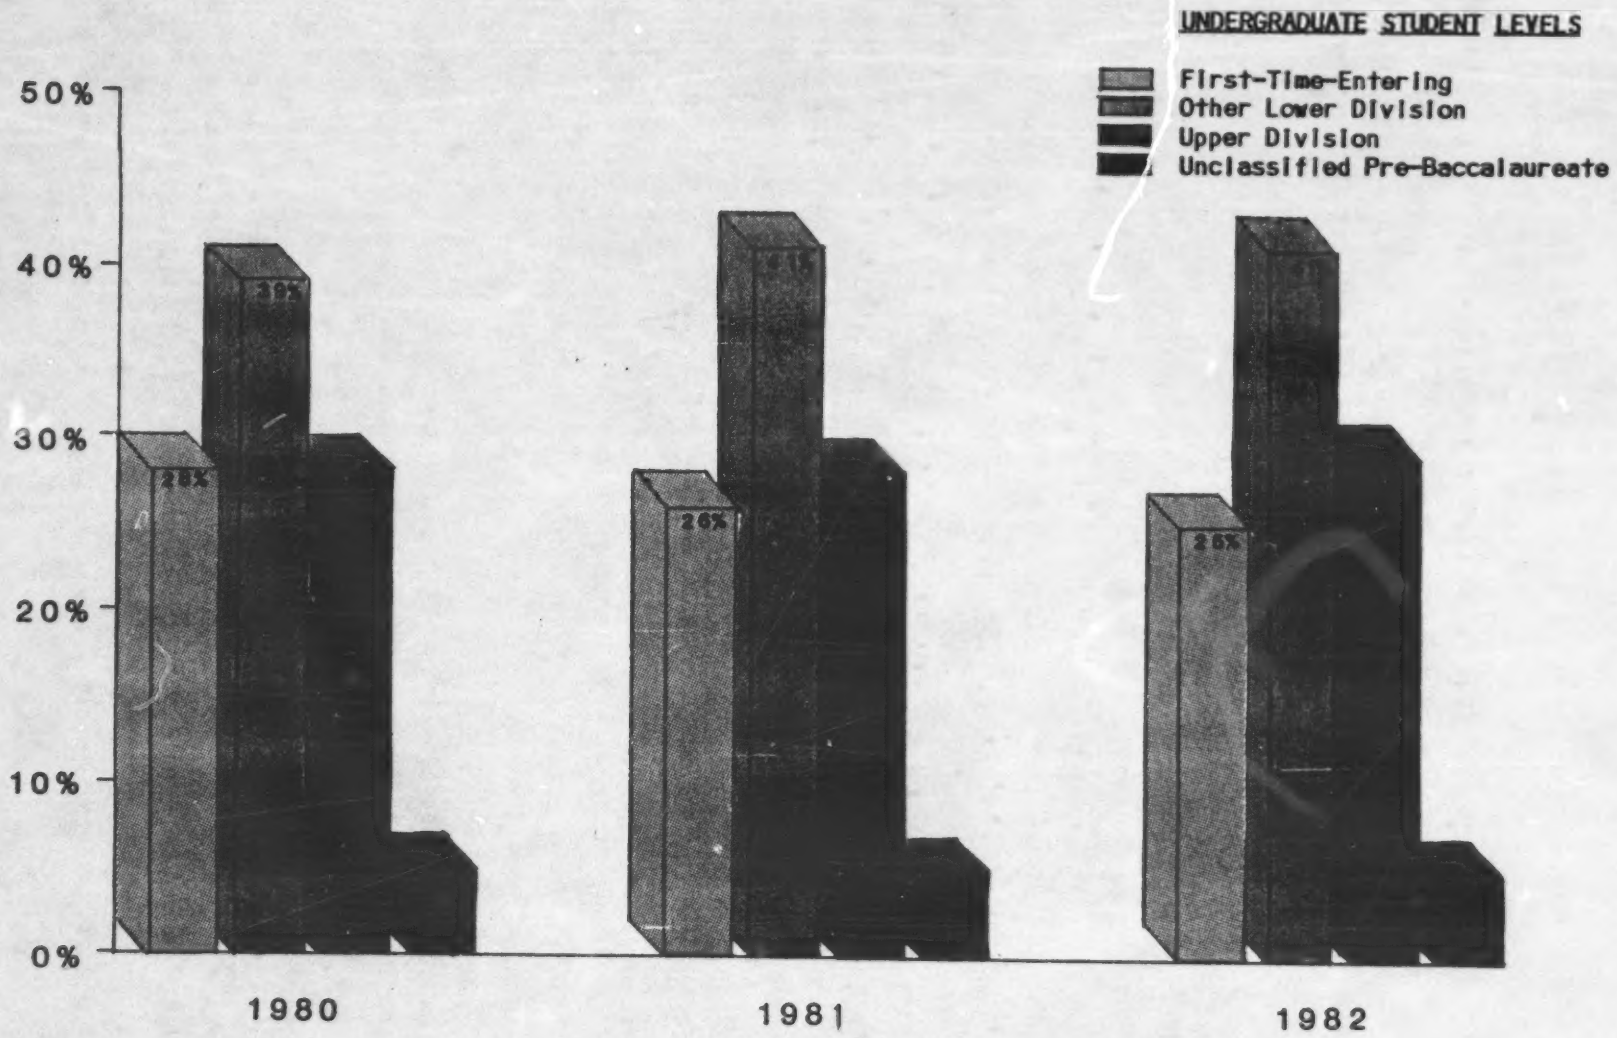
An upper division student is one who is enrolled in a bachelor's degree program and has earned 60 or more semester credit hours. Typically, this individual is classified as a junior or a senior.

In 1982 there were 19,123 upper division students, 2.6% more than the 1981 upper division enrollment. The number of upper division students for 1980, 1981 and 1982 were 18,860, 18,628 and 19,123 respectively. At most institutions enrollment at the upper division level declined in 1981 and increased in 1982. Besides being higher than the 1981 enrollments, the 1982 enrollment level was usually even higher than the 1980 enrollment level. Part-time and full-time upper division enrollment at both the independent and state four-year institutions tended to follow this pattern.

Unclassified Prebaccalaureate Enrollment

A student who cannot be classified as a first-time-entering, other lower division or upper division student because he or she is not enrolled in a program of study leading to a degree/diploma or certificate, even though taking courses with regular students, is classified as an unclassified prebaccalaureate student. This category includes students who have received an earned baccalaureate degree, have not been accepted by the institution for graduate level study and are taking undergraduate level courses, such as teachers taking courses for certification.

FIGURE 3. UNDERGRADUATE HEADCOUNT BY STUDENT LEVEL AS A PERCENTAGE OF TOTAL UNDERGRADUATE HEADCOUNT, FALL 1980 THROUGH FALL 1982



In 1982 there were 3,224 students reported as unclassified prebaccalaureate students. It appears the total number of unclassified prebaccalaureate students has remained relatively stable during the last three years, although there has been an increase in the proportion of those who were full-time students. However, because of reporting problems experienced by the institution in classifying unclassified prebaccalaureate students under the new AHEIS reporting system, this data should be reviewed with caution.

Graduate Enrollment

At the graduate level, students are either classified as master's, specialist, doctoral or unclassified post-baccalaureate level students. A master's level student is one who has received an earned baccalaureate degree, has been accepted for graduate level study and has enrolled in a master's or a doctoral program but has earned less than 30 semester credit hours in graduate course work. A student who has received an earned baccalaureate degree and is enrolled in a specialist degree program is classified at the specialist level. A doctoral level student is one who has received a master's or specialist degree, or has earned at least 30 semester credit hours in graduate course work, and is enrolled in a doctoral degree program. A student who has been awarded an earned baccalaureate degree and is eligible to enroll in credit courses at the graduate level but who cannot be classified into one of the other graduate categories because he or she has not been accepted by the institution for graduate level study is reported at the unclassified post-baccalaureate level.

Doctoral and unclassified post-baccalaureate level enrollments were the only graduate areas with increases in enrollment in 1982. However, doctoral enrollment in 1982 was lower than that reported in 1980. Both master's and specialist levels experienced declines in enrollment. The rate of decline at the graduate level has slowed this year. Enrollment at the graduate level had declined by 3% in 1981 but had slowed to a 1% decline in 1982. There were 1,859 graduate students attending college full-time this year. This was an increase of 21 students. However, there were 61 fewer part-time graduate students. The net result was a decrease of 40 graduate level students.

The average load for a full-time graduate student was 11 hours and four hours for a part-time student. These average loads have remained stable during the last three years.

First Professional Students

A first professional student is one who is enrolled in a first professional degree program which, in Arkansas, are law, medicine and pharmacy. UAF and UALR offer degrees in law and the University of Arkansas for Medical Sciences (UAMS) offers an M.D. and D.Phar. degree. All three institutions had declines in first professional students. First professional enrollment at both UAF and UALR declined by 5.7% and enrollment at UAMS declined by 1.3%. The decline at UAMS is the result of increased attrition among medical students. The number of students being accepted in the M.D. program has not changed. The average loads for full-time first professional students at UAF, UALR and UAMS were 14, 13 and 19, respectively.

HEADCOUNT AND AVERAGE LOAD BY CURRENT LEGAL RESIDENCE

State two-year and four-year institutions provide headcount enrollment by current legal residence. A student's current legal residence is a student's present legal residence as determined in accordance with the institutions' residency policy which is used as the basis for institutional fee assessment policies. The following categories are used in determining current legal residence.

1. In-District - Having legal residence within the boundaries of the designated district in which the reporting institution is located. This applies only to state community colleges.

2. In-State - Having legal residence within the boundaries of the state in which the reporting institution is located. If the category in-district is used, then in-state excludes persons classified as in-district.

3. Out-of-State - Having legal residence in one of the United States but outside the state in which the reporting institution is located.

4. Foreign - Having legal residence in a foreign country.

For purposes of this report, out-of-state will include students who are residents of a foreign country or of a state other than Arkansas. However, the AHEIS reporting system includes counts of residents of each of the 50 states and the total number of foreign students.

Table 9 displays on-campus headcount by student level and current legal residence by type of institution for fall 1980 through fall 1982. Out-of-state enrollment at the state four-year institutions was up 457 students, with 57% of the increase occurring at ASUJ. The increase in out-of-state students at ASUJ was the result of the out-of-state fee waiver for certain contiguous states and the implementation of the program for Saudi Arabian students. (Appendix Tables A-10 and A-11 display on-campus headcount and average load by student level and current legal residence by state institution for fall 1982. Also, Appendix Tables A-12 and A-13 display percent full-time and part-time students by level and current legal residence by state institution for fall 1982.)

At state two-year institutions, increases in out-of-state enrollment during 1981 and 1982 were 69 and 93, respectively. Fifty-three percent of the increase in fall 1982 out-of-state enrollment at the two-year level occurred at Westark Community College (WCC) (up 49 out-of-state students). This increase was the result of an increase in the number of students from LeFlore and Sequoyah counties in Oklahoma attending WCC. Under WCC policies, because these counties are within the Fort Smith SMSA, students from these counties are assessed out-of-district fees instead of out-of-state fees.

Table 10 displays on-campus average load by student level and current legal residence by state two- and four-year institutions for fall 1980, 1981 and 1982. As usual, out-of-state students tend to take slightly heavier loads than in-state students. This was true at both two-year and four-year institutions and among both part-time and full-time students. The average load for all full-time in-state students during fall 1982 was 14.74 hours. The out-of-state students took an average of 14.86 hours.

MEDIAN AGE OF STUDENTS

One in four Arkansas college students is now 25 years of age or older. This compares with one in three students 25 or older nationwide. According to an article in the 1981 edition of The Condition of Education, "institutions concerned about maintaining their enrollment levels are looking to the older groups to offset at least partially, a projected decline in the population of 18 year olds during the 1980s."

Full-Time Students

The median age of Arkansas college students has remained stable during the past three years. The median age of all full-time Arkansas college for the last three years was 20. Twenty-seven was the median age of all part-time students and 21 for part-time and full-time students combined for fall 1980, 1981 and 1982 (See table 11).

Part-Time Students

At present, 57% of Arkansas college students 25 years old and over attend college part-time, compared with 13% of younger students. These percentages were exactly the same in fall 1980. Nationally, 72% of students 25 and over attended college part-time, compared with 17% of students under 25. The difference in the Arkansas and national averages was due to the difference in proportion of students attending college part-time. In the fall of 1982, 25.3% of the total enrollment in Arkansas colleges attended part-time as compared to 45.3% nationally. It appears Arkansas colleges have not adequately tapped the older student market.

Among the state four-year institutions the median age of part-time students was 28, while at the state two-year institutions the median age was 27. The median age of part-time students at independent two-year institutions during fall 1982 was 31. The median age of part-time students at the four-year independent

institutions was 24. It should be pointed out that only 8% of the four-year independent students attended part-time. (Appendix Tables A-14 through A-25 display age of students by student level by attendance pattern by institution for fall 1982.)

WOMEN IN HIGHER EDUCATION

In 1978, for the first time, women exceeded men in total college enrollment. Females, as a percentage of total enrollment, increased to their highest level, 54.2%, in 1980. However, during fall 1981 female students declined to 52.3% while male students increased to 47.7% of the total Arkansas higher education enrollment. During fall 1982, females, as a percentage of total enrollment, increased slightly. Of the fall 1982 enrollment, 52.5% were female (See Table 12). Figure 4 displays male and female students as a percentage of total enrollment for fall 1976 through fall 1982. Data for enrollment by sex was taken from NCES form 2300-2.3, Fall Enrollment and Compliance Report of Institutions of Higher Education, 1982. These numbers are not comparable to the AHEIS fall enrollment 2 series reports due to the inclusion of off-campus as well as on-campus enrollments in the NCES 2300-2.3 enrollment information.

NCES recently reported that the number of female students attending college nationally this fall declined by 0.4% while the number of male students increased by 0.2%. "Ten years ago, women constituted 43% of all college students. Between 1974 and 1979, the number of female college students increased by 32.6% while the number of male students increased by only 1.4%. By the fall of 1979, women had become the majority among college students with 51% of the total. This year, 51.6% of all college students in the United States were women."

According to the November 24, 1982 issue of The Chronicle of Higher Education, "If 1982 does mark the end of the accelerated growth of female enrollment, it could be because women have overcome the historical disparity in enrollment rates. The Census Bureau estimates that women account for 51.3% of the total U.S. population in 1982. Thus, women have more than proportionate representation in the ranks of college students."
